Hello Mr. Garis,

On behalf of Siesta Key Association of Sarasota, Inc. please find attached our letter sent to the Sarasota Board of County Commissioners on July 14, 2016. On August 23, 2016 the County Commissioners responded with unanimous direction to our concerns and requests within this letter.

In addition to the Permit Application itself, our request of the County Commissioners is based on our Sarasota County Comprehensive Plan. In many areas which the City of Sarasota is outlining their plan for dredging and the seagrass mitigation, permission from our County Commission is required. These items would violate the Values and the Policies within our Comprehensive Plan.

<https://www.scgov.net/CompPlanUpdate/Documents/Transmittal%20Draft%20-%20Sarasota%20County%20Comprehensive%20Plan%20Volume%201.pdf>

While there is an updated Comprehensive Plan submitted to the State of Florida July 6, 2016, the language specific to our interests is consistent and unchanged from the existing Plan. These areas are highlighted within the additional document attached to this email.

Our understanding of these areas impacts whether the current Dredging Permit Application would be consistent with our Comprehensive Plan.

In consideration of the RAI#2 Permit Application response from USACE, please include this email and attachments as part of our RAI#2 comments of August, 18, 2016.

With appreciation for your assistance,

Catherine

Catherine E. Luckner

2d Vice President
